Objective

Motivated Computer Programming student specializing in Low-Code Development, seeking an entry-level position or internship where I can apply my skills in Power Platform, database management, and automation to solve real-world business problems.

Education

Diploma in Computer Programming
George Brown college, Ontario
Expected Graduation: Apr,2026

Technical Skills

Low-Code / No-Code Tools:

- Microsoft Power Apps
- Power Automate
- Power BI
- SharePoint
- UiPath (RPA)

Programming & Web:

- JavaScript
- HTML, CSS
- SQL
- Basic Shell Scripting

Database:

- Microsoft Dataverse
- SQLite

- Database Design (ER Diagrams)

Tools & Platforms:

- GitHub
- Visual Studio Code
- Microsoft Office Suite

Projects

Internal Equipment Request System (Power Platform)

- Designed and developed a low-code application using Power Apps and Dataverse
- Automated request approval workflows using Power Automate
- Created Power BI dashboards to analyze request trends
- Improved process efficiency and reduced manual work

Employee Training Tracking System

- Built automated workflows to track employee training completion
- Integrated SharePoint with Power Automate for notifications
- Developed logging system using Excel for tracking activities

---

UIPath Automation Project

- Developed an RPA bot to extract city data from Excel
- Automated web data retrieval (temperature updates)
- Updated Excel records automatically with extracted data

Web Development Assignment (JavaScript)

- Created dynamic webpages using JavaScript and DOM manipulation
- Implemented conditional logic, loops, and arrays
- Designed user-friendly interface with inline CSS

Soft Skills

- Problem-solving
- Team collaboration
- Communication
- Time management
- Attention to detail

Experience

Student Projects & Academic Work

- Completed multiple real-world assignments using low-code tools
- Worked independently and in teams to deliver projects on deadlines

---

Certifications

- Microsoft Power Platform Fundamentals (PL-900) *(in progress)*
